# INTRODUCTION

We're Zeptil, a financial and investment service that makes it fast, safe and fun to invest and trade digital currency, anywhere in the world. We believe that the future of money is one where we, the people, are in control of our own economy. A future where there's no place for middle-men, hidden fees and fine print. To deliver on that promise, we have come to work every day since 2019 to create the simplest financial service out there – spoken in a language you can understand, and backed by customer service you can count on.

Zeptil Indices are the bellwether for the market. We are the industry standard for institutional-grade cryptocurrency pricing with billions of dollars in monthly trading volume quoted against them. The flagship Zeptil Bitcoin Price Index (XBX) is a spot reference rate for BTC that benchmarks the world's first publicly traded bitcoin fund and the world's first bitcoin ETF.

We have the best over-the-counter (OTC) trading services you can count on. Over-the-counter (OTC) trading offers institutions, high net-worth individuals, and businesses greater liquidity and customized service to place large orders that would affect the market if placed independently. No matter the volume, the OTC offering will provide you with secure, professional, and instant execution and settlement services.

Our industry-leading account managers have robust trading experience, and are more than happy to share their expertise and knowledge of the crypto markets.

We can't stretch this one enough, "Not your keys, not your coins". We'll help you secure your coins in an ultimate setup, suited to your needs. In addition to bitcoin, the Zeptil OTC desk offers dozens of popular cryptocurrencies and is constantly adding new ones.

# VISION

**To be a recognized crypto investment company focused on growing sustainable production, delivering on our commitments for excellence and valuing and developing our employees.**

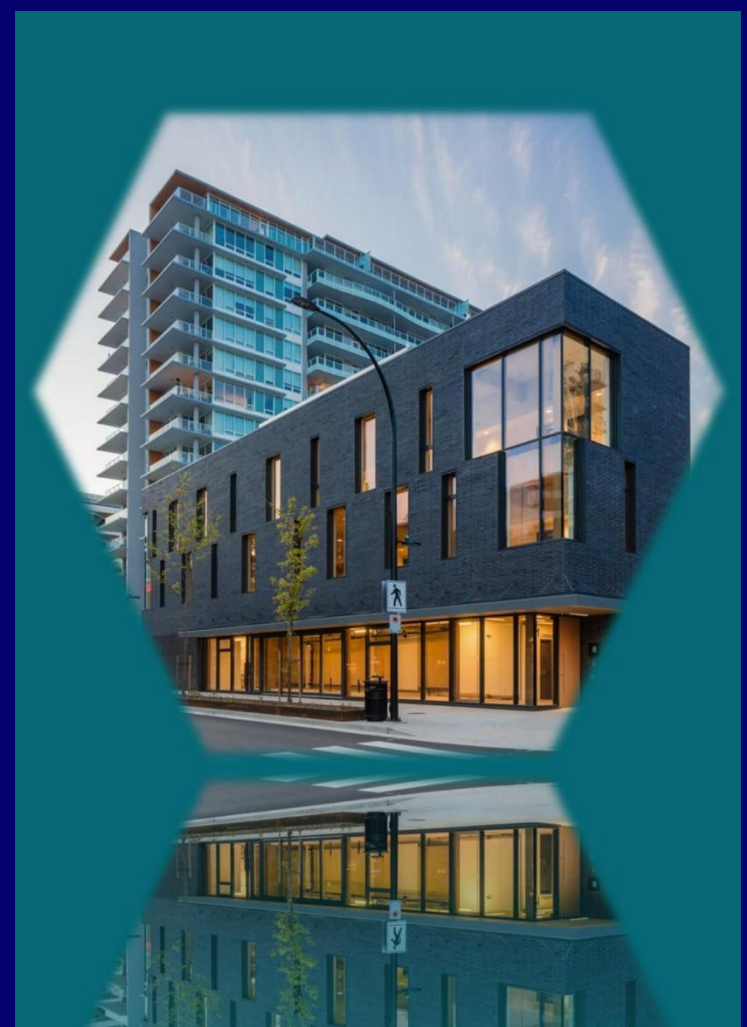

**Also to give our esteemed customers services they will always be proud of, with great yielding profits while relaxing.**

## MORE TO IT....

**We aim to lead in the investment industries, we have the most finest and fastest group of team who have been in crypto trading for several years with no failures.**

**We also aim to build up many trading armies with our career vision.**

**Our visions have almost been accomplished. with the help of**

## MISSION

Create and grow sustainable value for our stakeholders through the application of best practices in mining and our commitment on protecting the health and well-being of our employees and the environment in the communities where we work.

We simply elevate the communities and the natives with an empowerment program, enriching many families and children most especially.

We have completed many free empowerment program where we give children free educations and parents free cash gifts to support their parents hood.

Blockchain has enabled global economics changes in our society with people in developing countries has access to digital assets for the first time in history. We strive to disrupt FinTech by building an accessible and scalable infrastructure that allows developers to create inclusive financial applications to serve the world's unbanked.

Using decentralized blockchain network to bring billions of unbanked into the global economy. Converting real-world assets into digital token on blockchain for greater liquidity, data security and transparency. We are creating a one-stop solution for digital assets – including token issuance, financing and post distribution management. We have a once in a lifetime opportunity to create something larger than ourselves, by building the infrastructure of the new economy. Bitcoin gives us a rare opportunity to participate in something bigger and more important than our individual selves.

Bitcoin is a watershed moment, not only in the history and invention of money, but in how we relate to each other. We may not be the best (yet) or the boldest (soon enough), but we are the most trusted and transparent bitcoin miner in the world. **And that's what makes us different.**

We care about the environment and believe that bitcoin miners have an important role to play in decarbonizing our economy. We source sustainable energy and constantly optimize our operations to make them more efficient. We collaborate with utilities to make the grid better for everyone.

1. Leave the world better than we found it.
2. Build the infrastructure of the future.
3. Value growth for the greater good.

# OUR BEST SERVICES

We have the best mining services you can ever seek for, reliable, fast, great interest, and easy process. There are many reasons why we are the top notch in mining and trading services.
